

**Construction**

High conductivity bunched plain flexible copper conductors, insulated in a parallel configuration with flexible grade PVC, with Blue, Black or White tracer for polarity indication.

Applications

For battery chargers, hi-fi sets, loudspeakers, light appliances, car radios and many other applications.

Specification

Voltage Rating: 300/500 Volts

Test Voltage: 2000 Volts

Current Capacity AC: See table below

Temperature Range: -10° to +80°C

Flexibility Class: 4 & 5

Conductor Type: High conductivity annealed copper

Insulation Material: General purpose flexible grade PVC

Colour Options: Red with Black tracer; Transparent with Blue tracer; Transparent Blue with White tracer; White with Black tracer; White

Packaging

Available in 100 metre reels
